

INDEPENDENT QUARTERLY SURVEY OF STORAGE DOMES & LIMESTONE
COVERED STORAGE BUILDING AT JEA – NORTHSIDE STATION
JACKSONVILLE, FLORIDA

The two (2) storage domes at the JEA – Northside Station require survey work to determine quantities of petroleum coke and coal inside of the storage domes. In addition, the covered building for the storage of limestone requires survey work to determine quantity in inventory. The service for the work inside of the domes and the covered storage building can only be performed by an independent surveying company that specializes in “laser scanning” or something similar that can accurately quantify the volume of product stored inside of each dome and the covered storage building.

JEA will require the petroleum coke and coal stored in both domes and the limestone in the covered storage building to be surveyed once per quarter starting in December 2024 and running until September 2027 to determine quantity in storage.

The survey work should be scheduled for the following dates to guarantee that JEA will receive the quantity determinations prior to the month ending each quarter as follows:

- Week of December 16, 2024
- Week of March 17, 2025
- Week of June 16, 2025
- Week of September 15, 2025
- Week of December 15, 2025
- Week of March 16, 2026
- Week of June 15, 2026
- Week of September 14, 2026
- Week of December 14, 2026
- Week of March 15, 2027
- Week of June 14, 2027
- Week of September 13, 2027
