## 1.0 INTRODUCTION

This Post-Closure Care Plan was prepared for the Phase I development Byproduct Storage Area B (Area B Phase I) at the St. Johns River Power Park (SJRPP). This plan was prepared in accordance with Title 40, Part 257, Subpart D of the Federal Regulations. Specifically, this plan was prepared to meet the requirements for a written post-closure care plan as required by §257.104(d) for post-closure care of coal combustion residual (CCR) landfills. The information contained in this plan will be used to assist SJRPP in the active maintenance and monitoring required during the post-closure care period.

## 2.0 POST-CLOSURE CARE PLAN

### 2.1 Facility Contact Information

The name, address, telephone number, and email address of the person or office to contact during post-closure period in accordance with §257.104(d)(ii) is included provided below:

JEA/St. Johns River Power Park  
21 West Church Street  
Jacksonville, FL 32202  
Facility Contact: Kevin Holbrooks  
Telephone: (904) 665-4540  
Email: HOLBKE@jea.com

### 2.2 Monitoring and Maintenance Activities

In accordance with §257.104(b), monitoring and maintenance activities will be performed to maintain the integrity of the final cover system. During the post-closure care period of the site, the final cover system of Area B Phase I will be inspected at least annually. The following components will be monitored:

- Final cover system for signs of erosion, evidence of subsidence, signs of ponding water, and overall general condition;
- Surface water management system for signs of sedimentation, erosion, positive drainage, excessive vegetation, blockages, and overall general condition;
- Condition of vegetative growth for distressed vegetation, excessive vegetation, unwanted vegetation (woody growth); and
- Condition of groundwater monitoring wells.

Post-closure monitoring will be documented and will include the date, components and item monitored, name of individual performing the monitoring, a description of deficiencies observed (if any), and maintenance/repairs performed including completion date (if any). Completed post-closure monitoring forms will be placed in the facility operating record.

### 2.3 Groundwater Monitoring

CCR Rule related groundwater monitoring activities will continue through the 30-year post-closure care period in accordance with §257.90 through §257.95. If at the end of the 30-year post-closure care period, Area B Phase I is in assessment monitoring (or corrective action), post-closure care of the unit will continue until the site can revert to detection monitoring under §257.95.

Groundwater monitoring activities will also continue under the facility Conditions of Certification.

Maintenance of the groundwater monitoring system will be performed on an as-needed basis. The monitoring wells will be inspected during each sampling event for siltation within the well, damage to protective casing, lock condition, concrete pad condition, dedicated pump operation, and dedicated tubing conditions. Necessary maintenance will be performed prior to or during the next scheduled sampling event depending on the repairs/maintenance required.

### **3.0 POST-CLOSURE PROPERTY USE**

No post-closure use of Area B Phase I is proposed at this time. SJRPP will maintain control of and limit access to the facility. If the post-closure planned use is changed, the post-closure plan will be revised, and any necessary demonstrations will be prepared in accordance with §257.104(d)(1)(iii).

### **4.0 POST-CLOSURE CARE COMPLETION**

Within 60 days following the completion of the post-closure care period, a notification verifying that post-closure care has been completed will be prepared in accordance with §257.104(e). This notification will be certified by a qualified professional engineer licensed in Florida and will be placed in the facility's operating record.

## Signature Page

This Post-Closure Care Plan was prepared Area B Phase I to describe the post-closure monitoring and maintenance activities, provide contact information, and describe the intended post-closure property use.
