Plug In Today: EV Charging Infrastructure

ELECTRIFICATION REBATE PROGRAM

Electrification is the Future—Rebates Available for EV Charging Stations

As a JEA customer, you and your business can work smarter, not harder. The JEA Electrification Rebate Program offers rebates to offset the costs of electric vehicle supply equipment (EVSE), commonly called charging stations.

Charging stations in your workplace or fleet can bring financial, environmental and operational benefits, including:

- Lower fuel consumption
- Reduced lifecycle costs
- Emission reductions
- Availability of financial incentives

| EVSE Technology | Available Rebate |
|--|---|
| Level 2 (L2) Charger charging for fleets, employees or public use at a business | \$850 minimum per charger* |
| Level 3 (DCFC) fast charging at a business | \$3,000 minimum per charger* |
| Heavy-Duty Truck Stop electrification | Up to \$1,500 |
